

Access DICOM Quality Images from PowerChart At Westmead Childrens Hospital

The EIR Synapse® Mobility Web is a software-based Picture Archiving and Communication System (PACS). It provides for communication, storage, reformatting, rendering, and display of DICOM 3.0 compliant image data derived from various sources including CT and MRI.

Opening the EIR from PowerChart

- In Results, click the **Medical Imaging** tab.
- Double click **EIR Image Link**.

- Click the **CHW EIR Viewer** to view the required scan.
