

A series of helpful guides provided by the Information Technology Department

Accessing Previous Anaesthesia Records for Anaesthetists

- There are multiple methods to access previous Anaesthesia Records. Each have their pros and cons.
- Once opened Anaesthesia Records can be printed by clicking on the printer icon.

Viewing Anaesthesia Record from the Anaesthesia Module Select Case Window

- 1. Enter patient name or MRN into the search field.
- 2. Enter a date range to capture the time frame of previous anaesthesia.
- 3. Click Search.

7. Navigate along the timeline bar above the Anaesthesia Record by clicking right and left arrow.

Pros and Cons of using this method to view.

<u>Pro's:</u>

- Familiarity. The Anaesthesia Record is viewed as it would have been seen in the operating theatre.
- Ease. You are able to scroll through the entire Anaesthesia Record.
- Print preview. Can view Anaesthesia Record in high definition without reducing the picture/text quality seen in Powerchart.

<u>Con's:</u>

- Requires opening SaAnaesthesia (or opening the Anaesthesia Record from the Anaesthesia Records widget in PowerChart, then selecting SaAnaesthesia).
- Anaesthesia Record needs to be searched for.
- Actions that were executed are not easily seen.

Viewing Anaesthesia Records from Anaesthesia Summary in Powerchart

 Anaesthesia records can be opened from either the Anaesthesia Records widget OR Documents widget.

Pros and Cons of using this method to view.

<u>Pro's:</u>

- The entire Anaesthesia Record is condensed into one page.
- Medication, fluids and actions are easy to view.

<u>Con's:</u>

- Difficult to view the patient's physiological parameters.
- Can take minutes for record to open depending on the length of the Anaesthesia Record.

Option 2: Viewing via Documents widget.

1. Click on the Note Type hyperlink CHW Anaesthesia Printed Record.

Pros and Cons of using this method to view.

<u>Pro's:</u>

- The Anaesthesia Record has a similar appearance to original paper records.
- Medication, fluids, gases and physiological parameters are easy to view.

<u>Con's:</u>

- Initially the document opens requiring scrolling up and down, and must be dragged down and expanded to view.
- If the documented is zoomed in, the image viewer in PowerChart reduces the picture/text quality.
