Factsheet for clinicians

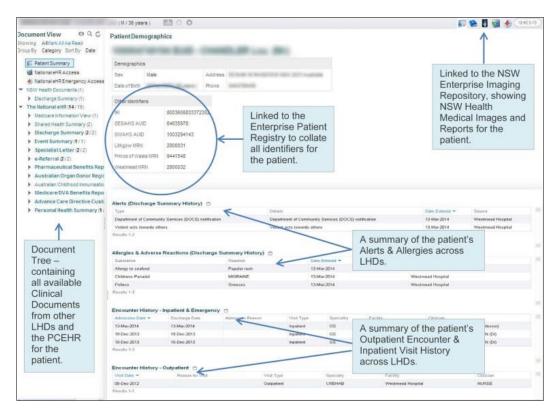

HealtheNet

What is HealtheNet?

HealtheNet provides NSW Health clinicians with access to a consolidated summary view of a patient's clinical information from across NSW Health and from a patient's national Personally Controlled eHealth Record (PCEHR) via the NSW Clinical Portal. It also includes the secure electronic messaging of discharge summaries to GPs using national standards, and the sending of discharge summaries to a patient's national PCEHR, where a patient has an eHealth record.

What is the NSW Clinical Portal?

The NSW Clinical Portal consolidates clinical information about your patient from outside your electronic medical record (eMR).

Patient information available in the NSW Clinical Portal includes:

- Patient identifiers from across NSW LHDs including Medical Record Numbers (MRNs), Area Unique Identifiers (AUIDs) and a patient's National Individual Healthcare Identifier (IHI)
- Cross-LHD discharge summaries, alerts, allergies, hospital visit histories and event summaries from community health services at Western Sydney & Nepean Blue Mountains LHDs
- Cross-LHD medical imaging studies and reports
- National PCEHR information (if a patient has a PCEHR) including Discharge Summaries from other States, Medicare Information, GP Shared Health Summaries, Specialist Letters, eReferrals and Consumer Entered Information.

How do I access the NSW Clinical Portal?

You can access the NSW Clinical Portal by clicking on the '*eHealth*' link in a patient's record in Cerner eMR. The NSW Clinical Portal will open in a new browser window - no additional login is required.

Via the Summary MPage	(if available)

Where are Discharge Summaries sent?

HealtheNet sends Discharge Summaries* electronically to three places:

- 1. To the NSW Clinical Portal for access by NSW Clinician's with an eMR connected to HealtheNet
- 2. To a patient's nominated GP via secure messaging
- 3. To a patient's **PCEHR***, where they have an eHealth record and have not requested that their discharge summary is not uploaded to their PCEHR on admission.

*Alerts are removed from discharge summaries that are sent to the PCEHR.

Do clinicians need to do anything differently?

The process for creating discharge summaries in Cerner eMR will not change. HealtheNet will only distribute a signed discharge summary electronically.

Where is HealtheNet live?

HealtheNet is state-wide and all LHDs can access the NSW Clinical Portal. All LHDs except for Sydney & South Western Sydney LHDs are contributing Emergency and Inpatient discharge summaries to HealtheNet. The HealtheNet team are working on including Community Health and Sydney & South Western Sydney LHDs discharge summaries in the future.

How can I get more information?

If you would like more information, please contact EHNSW-HealtheNet@health.nsw.gov.au

Alternatively, please visit: http://www.ehealth.nsw.gov.au/programs/clinical/healthenet.
