

A series of helpful guides provided by the Information Technology Department

## **Modifying Monitored Values**

Physiological parameters documented on the Anaesthesia Record can be modified in events where they are widely out of range caused by for example;  $SpO_2$  probe falling off or high HR artifact during diathermy.

1. Right click on dot in graph to be changed.

- 2. Click Modify SpO2- AN Value.
- 3. The Modify Monitor Value window pops up.
