

## Oncology View – Admit/Manage/Discharge

### Oncology View

- **Oncology View** is in the Oncology patient menu.
- The Oncology View is broken into five tabs: **Oncology Summary, Admit, Manage, Oncology Quick Orders and Discharge.**

### Admit, Manage and Discharge

- Clinicians add patient information that is then copied into the note once created.

### Menu

- Each tab is divided into sections.
- No section is mandatory.
- To move between sections click on the name in the menu.
- To change the order of sections, left click and drag a section to a new location.

### Common Functionality

- Information can be added to sections by clicking the plus button. +
- Autotext: in free text boxes enter a full stop to activate templates. Click on required template to open.

- Hover over results to find additional details.

- Date range selection: click on required range and click refresh.

- Expanding and contracting sections: solid triangles can be expanded and hollow triangles can be collapsed.

- To **Tag** (copy) Information or results for the Note right click to action the Tag and then left click to save.

- To view Observations and Results in different formats click between **Flowsheet** and **Ambulatory View**.

- To return to the last visited page click the back arrow (top left corner).

- Clicking a section heading will open the corresponding section in the patient's chart.

## Create Note

- Once all information has been entered click **Create Note** at the end of the menu.
- For details on how to complete the note refer to the **Dynamic Documentation QuickStart** located at .....
